Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 May 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear where there is antecedent basis in the disclosure for the recitation "connecting the power supply line of the logic gate with the ground line of the logic gate through the power supply capacitor cells". It is not clear how Fig. 3 supports this. Although applicant points out in the Remarks that the capacitor cells are connected with a power supply and with a ground, it is not clear that "connecting the power supply line...with the ground line" is a process step that is carried out. Applicant is requested to clarify.

Claim Rejections - 35 USC § 103

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uchida (US 6,430,735B2) in view of Sunter et al (US 6,204,694).

Uchida discloses a method for the automatic arranging of blocks in LSI which correspond to standard cells (col. 2, lines 3-14 and 55-60). This includes placing the

Art Unit: 2825

capacitor blocks in the vicinity of the logic gate cells and of placing the capacitor blocks in the areas not used for other functions (col. 3, lines 15-30).

Uchida is silent with respect to the determining the capacitance step.

Sunter et al is relied upon as discussed in paper No. 5 for its disclosure of the step of the determining of the capacitance and of the setting the capacitance value.

One of ordinary skill in the art would have been motivated to have combined the steps taught by Sunter et al with those of the process taught by Uchida because both teach designing and arranging capacitors and Sunter et al teaches that these further steps are known in the art and are conventional in the process of automatic arranging of capacitors in LSI.
